PROFESSIONAL EXPERIENCE

React Developer

CODECAREER.IO, REMOTE STARTUP

November 2020- Present

In my current role, I took the lead on 4 new features in a react web app for the organizations hiring system and tasked with improving load time. I can effectively self-manage during independent projects, as well as collaborate as part of a productive team. Daily I use React.js, redux, JavaScript and CSS, with some Bootstrap 4 for styling. I interact with express.js routes, store data in MongoDB and use popular node packages of form-hooks and Axios. My main task is to maintain a hiring system. My jobs include adding new features during sprints, while also improving responsiveness and reduce the time taken for the browser to render. I also interact with the designer to discuss further improvements.

Amazon Clone

REACT APP

2021

Built an Amazon React clone that is responsive, accessible and performant on all devices. The state for the app is managed via a useReducer which deals with setting a user and dealing with the cart logic. It is styled using BEM and vanilla CSS. I altered the design slightly to make it unique and also made personal improvements to the overall look. The App supports user login by using google firestore. Once logged in a user can then check out their cart and make a payment via stripe.

Cleaner

CITY FACILITIES, SAINSBURYS AND CO-OP

2014-2021

I have worked in various retailers and have 7 years of customer service skills. Here I have learned adaptability as everyday id different and never the same. The job requirements constantly change. It's good to embrace the change and see it as a challenge. That you need to listen and be attentive when a customer is talking to you and then clearly communicate your response.

EDUCATION

JavaScript: The Advanced Concepts (2021)

UDEMY

2021-03

JavaScript: Understanding the Weird Parts

UDEMY

2021-01
